# Temporary hospital – decant project Les Quennevais School Jersey

**Les Quennevais, a former school, has undergone a refit to transform it into a temporary health facility whilst Jersey's new hospital is constructed at Overdale, St Brelade.**

The "decant" is an essential part of the new hospital project, allowing Health facilities on offer at Overdale Hospital to be relocated to the former school until the new hospital begins welcoming its first patients in 2026.

SDS worked alongside Rok Group, the main contractor on the project, to provide all the doorsets required for Les Quennevais, using a mix of our Dfendoor and Lamdoor products to meet the requirements of client.

Craig De La Cruz, on behalf of Rok Group, commented:

**"SDS were very responsive during the Design stage and accommodated changes in a timely fashion.**

**The product supplied is of a high standard and is the calibre of material you would expect in a Hospital."**

*Craig De La Cruz MCI0B MAPM Rok Group*

**Solution**

**Lamdoor and  
Dfendoor**

**Location**

**Corridors  
Treatment Rooms**

**Finish**

**Snowflake with  
Cobble Frame**

**Contractor**

**Rok Group**

Some of the facilities relocating to Les Quennevais include:

- Child Development Treatment Centre
- Physiotherapy / Occupational Therapy
- Speech and Language Therapy
- Dietetics
- Psychology
- Older people's mental health
- Pain Clinic
- Pre-operative assessment
- Outpatient departments of neurology, rheumatology and urology

- Podiatry
- The audiology department currently at Overdale, including the hearing support centre

**"The team right through the company were extremely helpful and communication was excellent. Nothing was a problem. It was a pleasure to have SDS as part of our supply chain".**

*Craig De La Cruz MCIOB MAPM Rok Group*
